

DroidPilot Quick User Guide—Step1: Installation

Follow this easy step-by-step procedures below for default or custom DroidPilot installation.

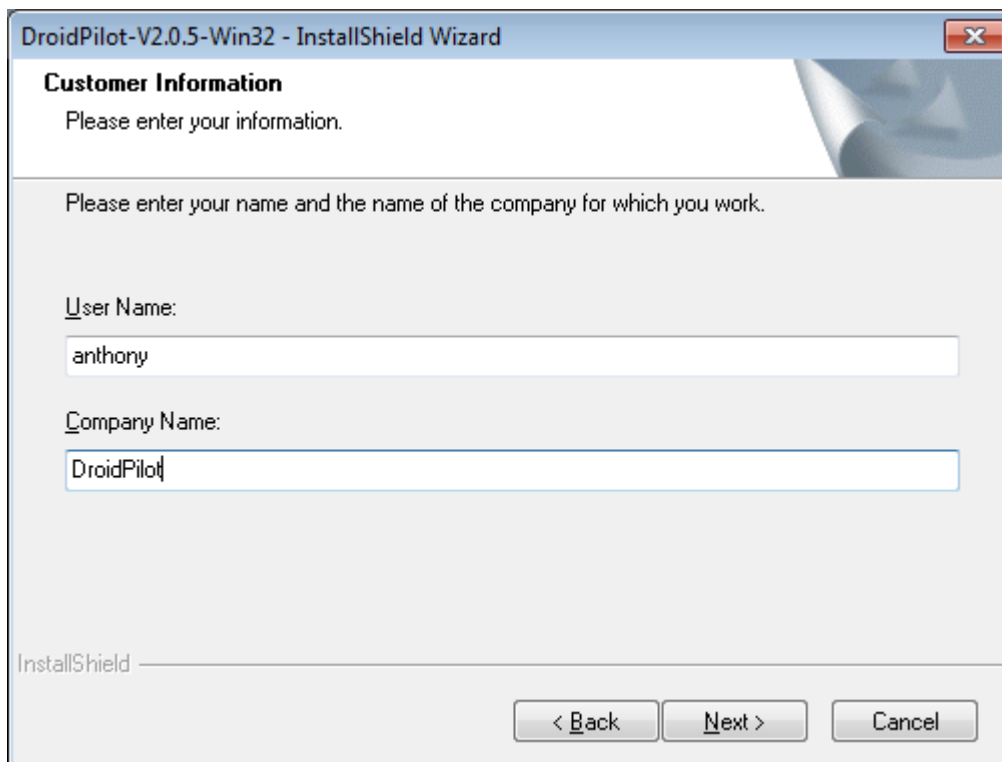

Execute the DroidPilot InstallShield installer wizard:

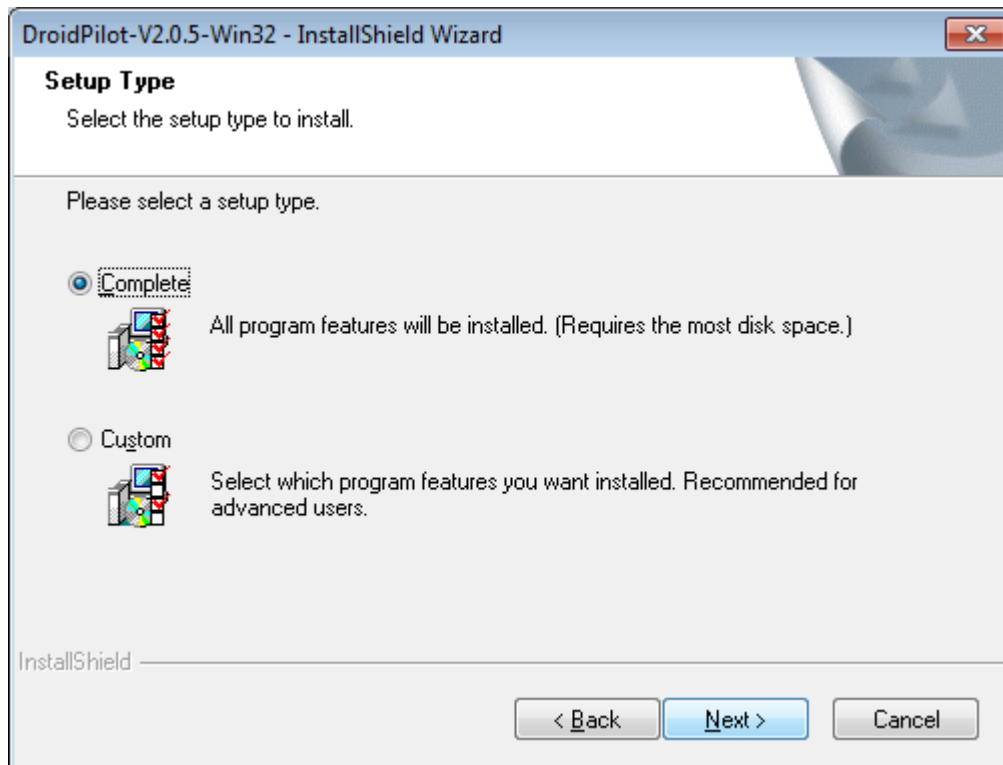

Read and select "Accept" of the end-user license agreement:

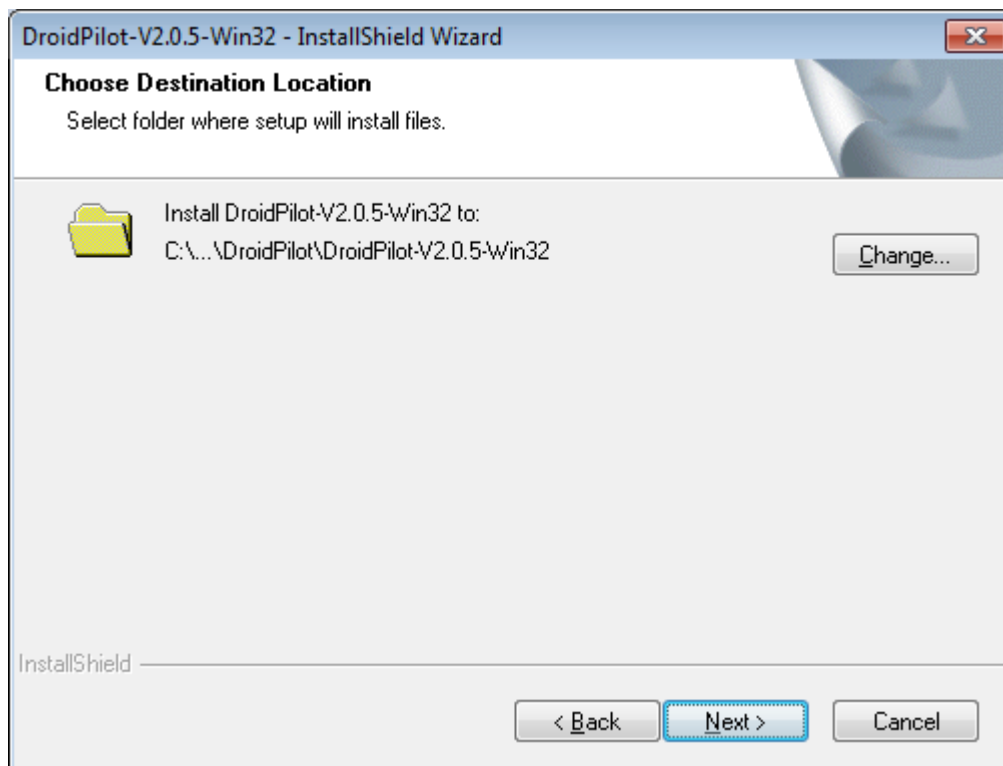

Enter your user name and company name:

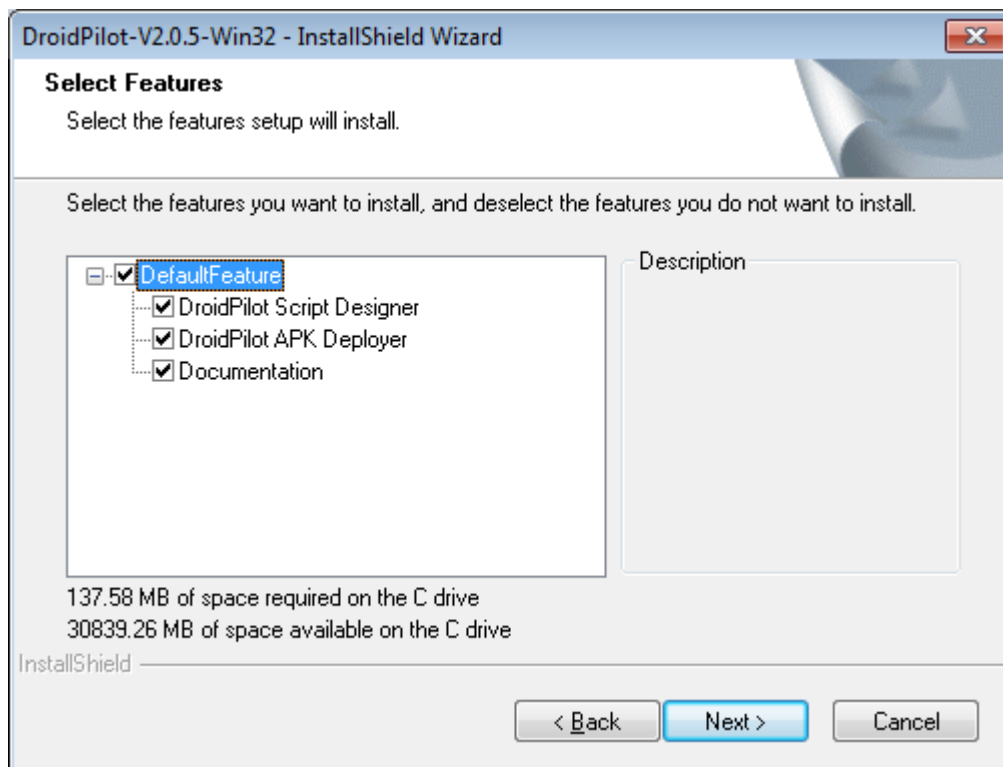

Choose your installation type here, select default "Complete" or "Customize" for selective features or installation folder destination:

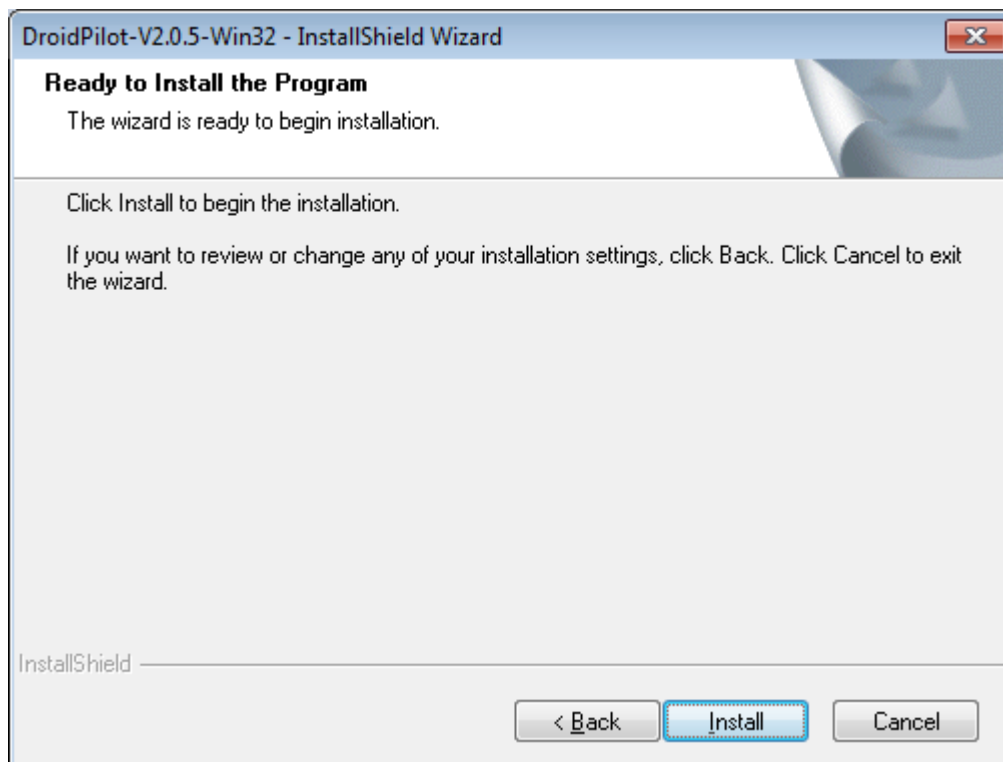

If you choose customized installation, you will see this window to have an option to change installation destination path:

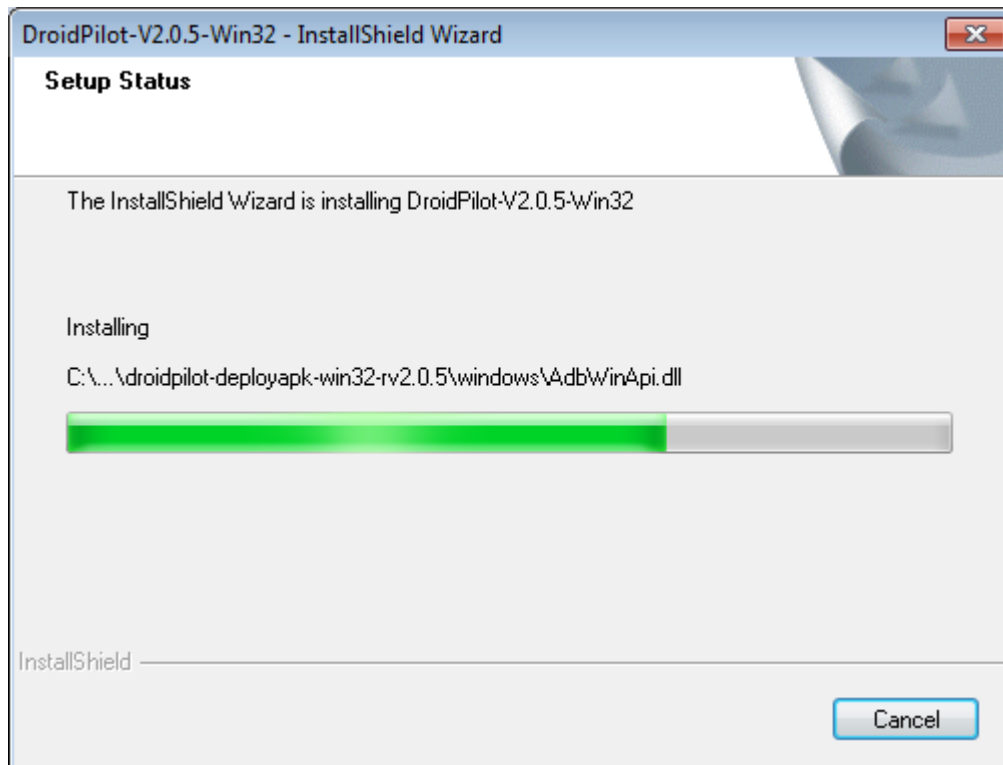

Select your required feature for installation. We suggest to select all features as default:

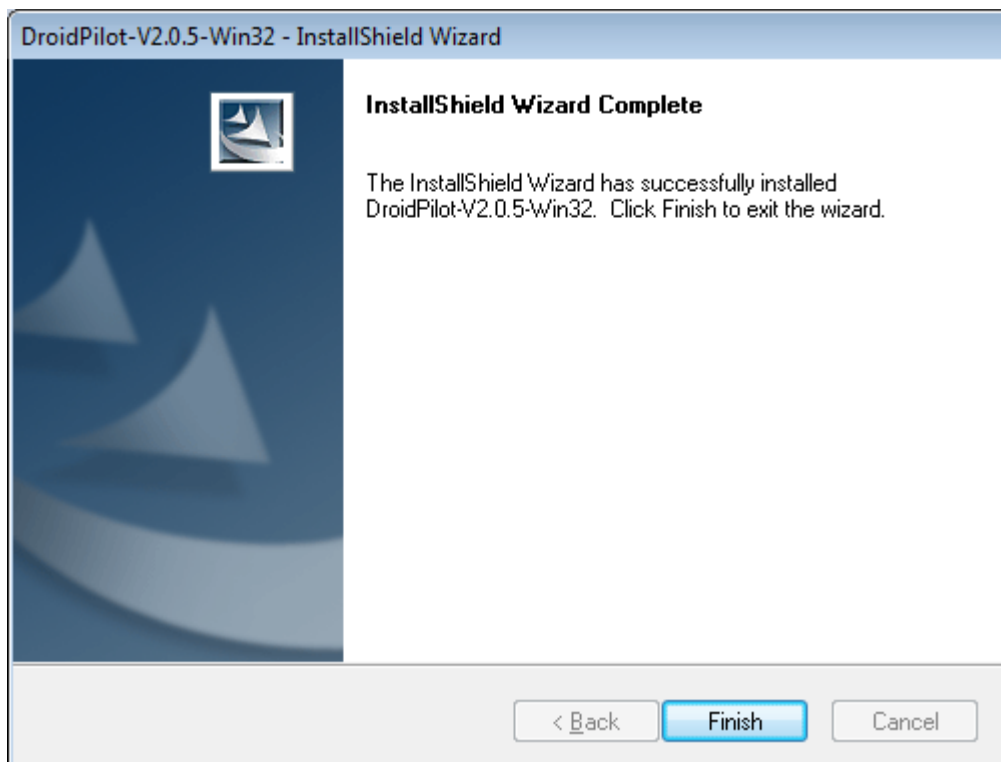

Confirm to start installation:

Installation progress window:

Installation finished..., But not totally completed yet:

Automatic installation of License file:

License file installation in progress:

Installation completed (Final):
